IEEE Antennas and Propagation Society
Research Awards for 2013-14

The IEEE Antennas and Propagation Society (AP-S) awards up to six $1000 pre-doctoral scholarships and up to ten $2500 PhD fellowships each year to encourage students to pursue a career in the area of electromagnetics. The awards are intended to support students involved in research directed by a faculty member at their institution who is a member of the IEEE Antennas and Propagation Society (AP-S). Two award competitions are held each year.

To be eligible, each applicant must...
- be an enrolled undergraduate (3-5 year program), master’s, or PhD student in electrical engineering or a related field at an accredited institution of higher learning. Undergraduates and master’s-level students compete for the pre-doctoral award, and PhD candidates compete for the doctoral award.
- if competing for a doctoral award, be a member of the IEEE AP-S at the time of application.
- have completed or be enrolled in at least one electromagnetics course at the time of application.
- show strong interest in a career in the area of electromagnetics.
- have the endorsement of a university/college faculty member who is a member of the IEEE AP-S.
- intend to work on a research project of at least one year in length that falls within the scope of the IEEE AP-S. The project may be started before the award recipients are announced but must end before the student’s current degree requirements are completed. Applicants who expect to graduate less than six months after the application deadline are not eligible.

Previous recipients of pre-doctoral awards are eligible for doctoral awards. Only one award of each type will be granted to a given student.

Selection criteria:
- Creativity and quality of the proposed project and the thoroughness with which it is described
- Discussion of the technical interests and skills of the student and how they relate to the proposed project
- Quality of writing in the proposal (e.g., spelling, grammar, word choice, organization, style, clarity of figures)
- Recommendation letter, with particular emphasis on the items listed in the fourth bullet below

The application must include...
- A cover sheet with the complete contact information for the student and the faculty advisor, including the student’s and advisor’s IEEE member numbers and the student’s application status (pre-doctoral or doctoral).
- A complete curriculum vitae or resume that includes periods of attendance at all schools, expected and completed graduation dates, and a list of published and submitted journal and conference papers.
- A two-page, single-column description of the proposed project in at least 10-pt font. It must include at least one paragraph that describes the technical interests and skills of the student and how they relate to the project.
- A recommendation letter from the faculty advisor. The advisor must be a member of the IEEE AP-S. An advisor may endorse one pre-doctoral applicant and one doctoral applicant at any given time. The letter should discuss the academic preparation and quality of the student; the potential of the student to contribute to the electromagnetics profession in the future; and the student’s ability to perform the proposed research. The advisor should also verify that the student is or has been enrolled in at least one electromagnetics course and will work on the project for at least one year prior to graduation.

Applications must include all four items listed above to be considered. All application materials must be written in English and integrated into a single PDF document. Each award recipient will be required to submit a photo to be used in an announcement in the IEEE Antennas & Propagation Magazine and to complete a United States Internal Revenue Service Form W-8 or W-9. Disbursement of award funds will be contingent on receipt of the photo and the appropriate form. All applicable taxes are the responsibility of the award recipient.

Application submission instructions will be posted at the AP-S web site (www.ieeeaps.org) and included in an e-mail announcement released before each deadline.

Questions should be directed to:
David Kelley, Associate Professor, Electrical Engineering Department, Bucknell University, Lewisburg, PA 17837
E-mail: dkelley@bucknell.edu, Tel.: +1 (570) 577-1313, Fax: +1 (570) 577-1449

DEADLINES: April 1, 2013 and November 1, 2013
