As a member of the PAC-12 Conference, the University of Utah’s College of Engineering features seven exceptional academic departments bolstered by 27 multidisciplinary research centers and institutes. The College’s diverse faculty provides the knowledge and skills to solve some of society’s most critical engineering challenges.

An interdisciplinary research environment promotes innovation, entrepreneurship and large-scale, multidisciplinary research breakthroughs. A front-runner in computer graphics, scientific visualization, fossil energy, robotics, video game design, neural interfaces and MEMS, the College is also a premier hub of data science, nanotechnology, nuclear and petroleum engineering. Financial support is readily available, and there is no cost for domestic Ph.D. applicants; foreign applicants pay just $15. Our strengths have attracted government and private funding, creating fellowships, paid research, teaching assistantships and loans. Eligible students may receive paid tuition.

COLLEGE OF ENGINEERING
In the past decade, we’ve more than doubled the output of master’s and doctoral degrees awarded. With $77.6M in research expenditures, the College ranked 37th in research productivity in the 2014 ASEE Profiles, which compares U.S. engineering and technology programs. We have also grown the size of the faculty to 188, which puts the College among the top 10 percent for faculty size.

LIVING IN UTAH
Utah is legendary for snowboarding, skiing, camping, hiking and biking. There is plenty to see and do:

• Six world-class skiing and snowboarding resorts within a 30-minute drive of the University of Utah.
• Five scenic national parks and dozens of state parks celebrated for their beauty and accessibility.
• Ranked No. 1 for Best Hiking Cities by National Geographic.
• Home of the internationally-renowned Sundance Film Festival, MLS’s Real Salt Lake soccer team and the NBA’s Utah Jazz.
